

Bendable Digital Platform For Libraries

Easing Your Digital Transformation

Bendable gives libraries a way to organize local and national learning content onto a single online platform.

It is beautifully designed and frictionless to use, allowing patrons to easily discover the content that's most valuable for them.

Helping to Close Your Community's Digital Divide

Bendable helps your patrons gain and build digital confidence while they use the platform.

I want to ...

Search or browse the topics below to jumpstart your learning.

Better understand technology

Explore languages, art, literature and more

Get my high school or college degree

Improve my math, reading or writing skills

Find resources for my kids

Sharpen my work skills

Prepare to get a new job

Start my own business

Deepen my professional skills

Giving You New Ways to Stretch Into the Community

Bendable is a powerful vehicle for libraries to reach beyond their branch walls and connect more deeply with their neighbors.

Helping You Support Workforce Development

Bendable helps your patrons make strategic choices about what they need to learn to advance in their careers.

What do you get?

A Robust Learning Marketplace

Co-curated by the library and the Bendable team, your learning marketplace will include:

- Learning content currently offered to library patrons
- Career Collections—learning pathways based on local labor market information
- Added content from Bendable partners (LRNG, GCF Global, etc.)
- Additional local learning content

An Exciting New Way For Community Members to Learn From Each Other

The Bendable team works with library staff to develop an initial set of Community Collections—personal playlists of learning resources (classes, TED Talks, podcasts, books, etc.) on a variety of subjects that are curated by local residents. Then we give you the resources so your staff can make more.

Meanwhile, our Community page allows local organizations—nonprofits, government agencies, educational institutions, employers and others—to serve up customized course lists for those they serve.

Tools, Training and Support to Keep Bendable Humming

As part of your Bendable package, you will receive ongoing technical, editorial and customer support.

In addition, you'll get:

- Access to the Bendable administration suite, plus training, so your staff can keep content fresh
- KPIs on Bendable usage in the community
- Continuing access to the Bendable brand, assets and platform improvements

What does it cost?

Bendable Pricing Structure

It costs \$35,000 to stand up the system—a process that takes about three months.

After that, there is an ongoing annual license fee of \$15,000 to \$30,000, depending on the size of your library system.

Additional content from Bendable's premium providers (Cell-Ed, Penn Foster, Study.com, edX) may also be purchased separately.
